MRI Breast Coil Cart

MRI Breast Coil Carts have been extensively tested and are proven to be non-magnetic. All materials used in the fabrication of Breast Coil Carts are non-magnetic, making these Coil Carts MR Conditional! The carts are equipped with heavy duty swivel casters that have an ergonomic dual wheel design. Breast Coil Carts will not alarm Ferromagnetic Detection Systems and have many additional benefits. Not only are the carts MR Conditional, they are extremely durable and moisture proof. These MR Conditional Carts hold up to continuous cleaning and disinfecting, even with straight bleach!

The Coil Cart above was designed to be the same height as the MRI for easy lifting of the breast coil.

Breast Shield

Today, CT Scans play a critical role in the diagnosis and management of most patients with complex thoracic and cardiopulmonary diseases. As the use of CT imaging increases, however, so does the risk for latent carcinogenic effects of ionizing radiation on radiosensitive tissue including the female breast. The recently redesigned AttenuRad Breast Shield System consists of a thin (1 mm) piece of bismuth impregnated synthetic rubber covering that mounts firmly on an offset quarter inch foam base. The breast shield system offers up to a 57% reduction of radiation exposure during a CT scan without significant changes in image quality, including artifacts and beam hardening effects. The single-piece AttenuRad CT Breast Shield is designed for multiple uses.

Thyroid Shields - Case of 10

Positioned over the Adam's Apple, the AttenuRad CT Thyroid shield is designed to provide maximum protection to the radio sensitive thyroid gland. To ensure tight positioning, a curved notch in the center of the shield is placed around the Adam's Apple and an adhesive backing holds the shield firm as the patient breathes and swallows. The AttenuRad CT Thyroid shield, when used for the soft tissues of the neck, is cut to a thickness of 1 mm allowing for a 60% dose savings to the Thyroid.
