Office Hours:

Monday thru Friday 7:00 am to 4:30 pm (CST)

Terms:

Our terms are NET 45 DAYS on all new and current accounts. C.O.D. if not current. Payments become due 45 days after the invoice date, if the order is complete or not. Shipments will be held if an account contains invoices over 45 days past due. The account will go on permanent C.O.D. when there is a history of past dues. Third party collection fees and legal fees must be paid in full before an account can be reopened.

Freight:

Freight will be prepaid and added to your invoice. Freight charges are part of your invoice and are due accordingly. Freight charges are not discountable.

Proof Of Delivery:

We will provide proof of delivery within 30 days of shipment upon request.

Claims For Damage Or Shortage:

Must be made within 48 hours of receiving. Shipping containers must be kept if shipment is damaged or short.

Shipments Arriving Via LTL Truck (Not UPS Or Fedex Ground):

The packages must be opened and inspected at time of delivery for any concealed damage.

Prices:

All prices are subject to change without notice. Prices reflect single unit cost, except where noted.

Returns:

No item will be accepted for return after 30 days from date of purchase. All returns must be labeled with a return authorization number which can be obtained from our customer service department. Claims for shortage, breakage or any other reason must be made within 48 hours of receipt. Shipping containers must be kept if shipment is damaged or short. All returns are subject up to a 25% restocking fee. The customer is responsible for all freight charges incurred. Custom Products are NOT Returnable.

Cancellation Charges:

Orders may be canceled without charge providing your request is received prior to shipment except custom orders. If the merchandise has been shipped there will be up to a 25% restocking fee, plus all freight charges incurred. Please get cancellation confirmation to avoid these charges.

Other Order Information:

We reserve the right to split shipments. We sell on first come first serve basis. Where available, substitutions will be shipped if the product ordered is not available or discontinued.

Featured Products

Relaxation and Success Imagery Audio Wellness CD

Using The Power of The Mind-Body Connection, 31 Minutes Long Relaxation and Success Imagery is designed to help teens and adults obtain the relaxation response. Learning to relax is a skill that results in a variety of health benefits. You will be guided through a progression of suggestions to relax all the muscles in your body. Once relaxed you will be asked to repeat positive self-statements and visualize yourself being successful in any goal behavior of your choice. This type of imagery is a form of mental rehearsal and is a proven technique to enhance the attainment of behavior you imagine. These research-based techniques improve learning, enhance athletic performance, promote healing and reduce the negative effects of stress. Relaxation and imagery provide the foundation for positive change and relief from stress. The script, accompanied by tranquil acoustic guitar, offers a choice of male voice on track 1 (15:16) or female voice on track 2 (15:53).

MR SAFE

MR CONDITIONAL

MR UNSAFE

Are your current MRI supplies certified?

MRlequip.com proudly introduces the first of its kind non-ferromagnetic MRI certified biopsy tray to include both a scalpel and needle. The first biopsy tray significantly reduces your fine institution of liability, when used in the prescribed fashion. Please call for MRI certification for future purchases. Thanks to your radiology family, larger production runs have lowered the price to \$399.00 for a case of 10 trays. That's just \$39.90 per tray.

MRl Non-Ferromagnetic "Certified" Biopsy Tray

Featuring a Non-Ferromagnetic Scalpel and Non-Ferromagnetic Needle

SAFETY: MRlequip.com is committed to bring to you the only MRI Non-Ferromagnetic Certified Biopsy Tray. Designed and certified within the guidelines of the new ASTM standards in effect so your facility no longer has to assume the liability for any safety accidents due to items made with ferrous materials.

USAGE FLEXIBILITY WITH LESS WASTE: Based on customer feedback for increased ordering and procedure flexibility you'll note that we packaged the main biopsy components separately as well as in a MRI biopsy tray. Trays can also be used as a MRI localization tray.

UNIQUE DESIGN: MRlequip.com offers the only MRI Non-Ferromagnetic certified disposable scalpel and MRI Non-Ferromagnetic certified needle.

COST EFFECTIVE: This product is a first of its kind. Developed by technologists who perform the procedures. It is cost effective, practical and safe to use. The trays are completely sterile and disposable.

MR Conditional to: 3-Tesla

The trays have a 2 year expiration date.

Tray Contents:

- | | |

Safety Eyewear - Pink

Construction allows for the eyewear to better fit the facial structure of a woman, and provides a more secure fit on the nose. Petite™ is 12mm slimmer than "standard" sized safety glasses, ensuring a great fit for women with more slender facial profiles. Better fitting eyewear will protect the eyes more effectively.

Breast cancer has impacted everyone in one way or another, and MRlequip.com provides a great venue to promote awareness. Perhaps one more woman in the workplace will get a mammogram because she sees the pink ribbons on all of her co-worker's glasses. MRlequip.com has partnered with the American Cancer Society, and will be donating a portion of all proceeds to assist in finding a cure for Breast Cancer. Please help support this wonderful cause as we provide a VISION FOR A CAUSE!

Case of 12

Features:

Feminine styling
Smaller vertical size
Soft rubber temples
Lightweight construction

Anti-fog coating
Pink tinted lens
Pink ribbon on temple
Z87+ high impact standard

Safety glasses come in pink, other colors available upon request, minimum order quantities apply. Contact customer service at 866-529-3526.

Bouffant Cap, Solid Pink with Ribbon

Comfort, style and durability are all in this bouffant cap. The body of the cap is made from a single piece of high-grade breathable fabric and is cut generously to ensure full coverage and control of hair. The pre-gathered elastic strip in back keeps the cap in place without pulling on your hair and the crescent-shaped forehead band has been constructed to conform to the natural shape of your head. One size fits most.

Breast Shield

Today, CT Scans play a critical role in the diagnosis and management of most patients with complex thoracic and cardiopulmonary diseases. As the use of CT imaging increases, however, so does the risk for latent carcinogenic effects of ionizing radiation on radiosensitive tissue including the female breast. The recently redesigned AttenuRad Breast Shield System consists of a thin (1 mm) piece of bismuth impregnated synthetic rubber covering that mounts firmly on an offset quarter inch foam base. The breast shield system offers up to a 57% reduction of radiation exposure during a CT scan without significant changes in image quality, including artifacts and beam hardening effects. The single-piece AttenuRad CT Breast Shield is designed for multiple uses.

MO-3014		Breast Shield Covers (10 per case)	\$20.00 cs.

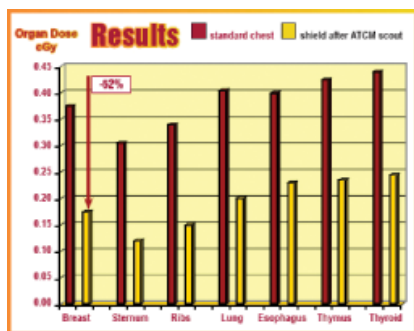

CT Breast Shield System

Studies have indicated that infants and children are as much as 10 times more susceptible to carcinogenesis from radiation than adults. Breast tissue exposed to radiation from CT procedures involving the chest or abdomen is an area of particular concern for young females. The CT Breast Shield System provides significant in-plane breast shielding (57%) for pediatric MDCT, without qualitative or quantitative changes in the CT image. The use of the system's offset foam base gives the shields additional substance and durability, making them easy to use. The use of the elevating foam also decreases the patient's exposure to scattered radiation.

Thyroid Shields - Case of 10

Positioned over the Adam's Apple, the AttenuRad CT Thyroid shield is designed to provide maximum protection to the radio sensitive thyroid gland. To ensure tight positioning, a curved notch in the center of the shield is placed around the Adam's Apple and an adhesive backing holds the shield firm as the patient breathes and swallows. The AttenuRad CT Thyroid shield, when used for the soft tissues of the neck, is cut to a thickness of 1 mm allowing for a 60% dose savings to the Thyroid.

Ordering Information

Model	Des.	Description	Price
MO-3001		Thyroid Shield (10 per case)	\$111.90 cs.

Eye Shields - Case of 20

The lens of the eye is sensitive to radiation during routine Cranial CT. Patient undergoing routine CT scans of the head are especially vulnerable to complications. The AttenuRad CT Eye Shield is a single-piece bismuth impregnated synthetic rubber covering designed to provide significant protection. The shield molds over the patients nasal bridge with the shielding portions laying flat over the patients closed eyes. Adhesive material ensures a tight seal with minimal air gaps. This shield is cut to a thickness of 1 mm, allowing for 50% dose savings to the eye lens. The AttenuRad CT eye shield, which can be used both for adults and pediatrics, is intended to be a single use product because of potential biological contamination.

FO-1019	CT 12 Piece Foam Positioning Kit	\$144.15 kit

CT Needle Guide

Specifically designed Needle Guides reduce procedure time and increase precision in CT-guided pain injections and biopsies. These flat, self-adhesive markers aid in needle angles and entry site by providing a clear accurate reference point with no spray artifacts. Needle guides are used by neurosurgeons, neuroradiologists and interventional radiologists at leading health institutions around the world. Pattern series of 7 lines creates 8 access windows.

Benefits:

- Flat, disposable markers do not indent tissue
- Clear adhesive backing permits visualization of exact marker placement
- Easy-to-read pattern helps identify accurate needle angle and entry site
- Windows allow needle passage
- Wider first line spacing aids orientation
- Thicker center line facilitates counting
- Flexible to contour the body
- Choice of two sizes provides options for various locations and body types

MRlequip.com proudly introduces a revolutionary patent pending draping system for Stereotactic Tables.

These drapes will minimize the daily cleaning routine of coils as well as ease the mind of clientele. The drapes provide comfort to patients, while providing protection from contagious diseases such as MRSA. Finally, your staff will be delighted with your decision to simplify clean up between patients, thus achieving a greater throughput.

Stereotactic Needle Biopsy Training Phantom

A tissue equivalent, compressible biopsy training phantom, that won't leak

This phantom closely mimics properties of the human breast. It is an ideal teaching tool and practice medium for mammographic needle biopsy procedures. Model PH-1001 also serves as an excellent quality assurance testing device for stereotactic systems and should be used whenever a new system is installed or repaired to insure accurate needle placement. Each solid mass can be biopsied multiple times. The phantom is constructed from a solid material so it will not leak when punctured.

Specifications:

Size: 1500 cc
Length: 10 cm
Height: 5 cm

Targets:

Dense Masses
Color: Black
Size: 3-6 mm
Quantity: 11
Position: random

Microcalcifications:

Color: orange on white mass
Size: 0.3 - 0.35 mm
Quantity: 2 clusters
Position: mid-plane on right and left sides

NOT for use in MRI

MRI Breast Imaging Pads

Unlike mammography which uses low dose x-rays to image the breast, MRI uses powerful magnetic fields and radio waves to create images of the breast. The MRI system is able to switch magnetic fields and radio waves to achieve views in any plane and from any orientation while x-ray mammography requires re-orientation of the breast and mammography system for each view desired.

Features:

- Comfort for Patient
- We offer two designs to fit your needs. Figure "A" is a T-shape with Velcro straps to close the open ends. "B" is closed ends with cut out in middle.
- Speeds up imaging with less personnel
- Place your coils on the open area
- Vinyl covered for easy cleaning

MRI Sat Pad Imaging Aids

The Sat Pad is a MRI image enhancement device somewhat analogous to the x-ray bolus device that have historically been used to improve image quality in radiographs. The Sat Pad is filled with a non-protonated fluid which has a magnetic susceptibility to that of water containing tissue. The Sat Pad is designed to improve the homogeneity of the local magnetic field, thereby improving images from such pulsing parameters as chemical shift fat saturation and gradient echo imaging. The pads are designed to be positioned against the patient's skin in the anatomical area of interest, thus eliminating the air/tissue interfaces. The perfluorocarbon liquid is nontoxic and chemically stable, and like gaseous chlorofluorocarbons, perfluorocarbon does not harm the ozone layer and is not regulated as a hazardous chemical. Please contact customer service for further details, including testimonials and return on investment.

Triple Modality Biopsy Training Phantom

For use in MRI, Ultrasound and X-Ray. 1 piece disposable.

The Triple-Modality Biopsy Training Phantom is a disposable phantom that was designed to closely mimic the properties of the human breast, making it an extremely useful accessory for training technologists and physicians, as well as for verifying the proper operation of a mammographic biopsy system. With the increasing use of breast biopsy procedures, it is essential that radiology healthcare providers maintain and increase their needle biopsy skills. This training phantom is a must for every mammography facility.

Specifications:

Size: 500 cc

Length: 12 cm

Width: 10 cm

Height: 9 cm

Material: Zerdine® Dense masses 2 to 8 mm in diameter for core biopsy.

Cystic Masses: 3 to 10 mm in diameter for needle aspiration.

Ordering Information

Model	Description	Price
PH-1000	Biopsy Training Phantom	\$401.80 ea.

Breast Ultrasound Needle Biopsy Phantom

Accurately mimics the ultrasonic characteristics of tissues found in an average human breast. The size and shape of the phantom simulates that of an average patient in the supine position. A special holding tray facilitates proper hand position during the training procedures. Protected by a membrane, the phantoms flesh-like consistency, (Zerdine®)(1) simulates needle resistance. Each cystic mass may be aspirated once while each solid mass may be biopsied multiple times. Cyst material is stained green and solid masses are black for easy identification. Size: 600 cc

Specifications:

Length: 15 cm

Width: 12 cm

Height: 7 cm

Material: Zerdine®

Cystic masses, green 8-15mm, qty 6 random
Dense masses, black 6-12mm, qty 6 random

US-1004	Needle Biopsy Phantom	\$294.00 ea.

Breast Elastography Phantom

Accurately mimics the ultrasonic characteristics of tissues found in an average human breast. The size and shape of the phantom simulates that of an average patient in the supine position. A special holding tray facilitates proper hand position during the training procedures. Protected by a membrane, the phantoms flesh-like consistency, (Zerdine®)(1) simulates needle resistance. The phantom contains several solid masses that appear isoechoic to the simulated breast tissue under normal ultrasound, but the lesions are 3 times stiffer than the background so they can be detected on elastograms. Lesions range in size from 2 mm to 10 mm diameter and are randomly positioned throughout the background. Size: 600 cc

Specifications:

Length: 15 cm

Width: 12 cm

Height: 7 cm

Material: Zerdine®

PI-Spray II Anti-Bacterial Solution for Ultrasound Probes

PI SPRAY II Disinfectant Cleanser for Ultrasound and Mammography is the essential medical accessory. PI SPRAY II cleans and disinfects all ultrasound probes, transducers, mammography compression plates and cassettes after each use and between patients. PI SPRAY II has a neutral pH and contains no alcohol, phenol, glutaraldehyde or ketones. It is safe for equipment and is an effective bactericide and virucide killing HIV-1. The active ingredient is conveniently user activated by adding tap water to the fill line indicated on the bottle.

Easy to use - no scrubbing or soaking

No harsh solvents, alcohol, phenol or glutaraldehyde

Neutral Ph - safe for all plastics

User-activated for maximum efficiency - just add water

Stable, pleasant fragrance

AccuFit Brachy Bandage

The "AccuFit™" Brachytherapy Bandage is designed to protect and stabilize Brachytherapy devices such as SAVI®, Contura®, MammoSite® and Axxent®. This bandage provides patient security and device stabilization during the 5 day treatments. This device is designed for single use.

Features:

PROFESSIONAL PRESENTATION: A specially designed brachytherapy stabilization system provides an enhanced professional look and a hygienic presentation to the patient. A fitted bandage gives a patient more confidence than the present application using absorbent gauze pieces cut and taped around the device.

STABILIZATION: This bandage is designed to specifically stabilize the external catheters that exit the breast brachytherapy device. Stabilization is imperative to reduce excessive imaging presently necessary to evaluate if the device stays in place between radiation treatments.

UNIQUE PATENT PENDING DESIGN: When used as a complete system our components provide protection, device stabilization and a very user-friendly application. We are confident you will be pleased.

EASE OF USE: This product is designed for ease of use by the patient and the medical staff. Where the brachytherapy device is located can increase difficulty for the patient to change the present protective products and may result in movement of the brachytherapy device. This product provides complete protection for the patient and medical staff.

PATIENT COMFORT: Soft, durable and protective constructions of fabrics are designed specifically to provide patients comfort.

Kit Contains:

- 2 Sterile 4 x 4 Drain Sponge
- 1 Contoured Sponge
- 1 "AccuFit" Brachy Bandage

Traditional Breast Binder - Floral Pink

Our Traditional Breast Binders are machine washable, durable and attractive compression garments that help reduce bruising, swelling and the incidences of hematomas following invasive breast / chest procedures. Our binders are easy to apply, comfortable to wear and more appealing to patients than Ace Wraps or other available post-op compression dressings. This inexpensive and easy to use dressing is a versatile and effective means to help Comfort Your Patients following invasive breast / chest procedures. Sizes are determined by measuring the largest area of the bust / chest.

Breast Sling for Echocardiography, Disposable

Cardiac sonographers are particularly at risk for work related musculoskeletal disorders of the hands and wrists. This disposable device is designed for use during echocardiography exams to support the left breast of patients with large, pendulous breasts. Suspending the breast allows better access to the acoustic window, improving image quality and alleviating the weight of the breast from the sonographer's hand and wrist. Use of the Breast Sling can help reduce the stress on the sonographer's scanning hand, reducing the exposure to the risk factors associated with this task. Disposable, single use only.

MRI Non-Magnetic CaviWipes

Presaturated with CaviCide®, CaviWipes™ are the only cloths proven to kill both TB (in 5 minutes) and HBV (in 3 minutes) with quick, easy-to-use, time saving convenience. CaviWipes are durable, nonwoven, nonabrasive towels that won't bunch up during use. They offer better surface contact than other wipes, requiring less force to apply solution to a surface. Better fluid capacity keeps the cloths fully saturated with CaviCide rather than its pooling at the bottom of the canister. CaviWipes is a cleaner and disinfectant, in one. Saving money by reducing repetitive inventory and time. They're recommended for use on nonporous surfaces and fixtures and are perfect for operating rooms, surgical centers, neonatal units, medical and dental operatories and other critical-care areas.

CaviWipes are Effective Against:	Kill Time
Mycobacterium tuberculosis var: bovis (BCG)	5 Min
Staphylococcus aureus	3 Min
Pseudomonas aeruginosa	3 Min
Salmonella choleraesuis	3 Min
Trichophyton mentagrophytes	3 Min
Methicillin Resistant Staphylococcus aureus (RSA)	3 Min
Hepatitis B Virus (HBV)	3 Min
Herpes simplex virus types 1 and 2	3 Min
Human Immunodeficiency Virus (HIV-1)	2 Min
Canine parvovirus	3 Min
Vancomycin Resistant Enterococcus faecalis (VRE)	3 Min

MRI Non-Magnetic Space-Saving Cart

White Polyethylene MRI Core SP Space Saving Lab Cart with Clear Door provides a large amount of extra storage and workspace in a small footprint. This all white cart carries almost three times its weight and the innovative sliding door provides access to your supplies in cramped rooms or tight hallways. The door locks in either the up or down position with an embedded security lock and comes with two keys. Keep supplies and other equipment in one of the three full-extension drawers or bulk storage area. Built in ergonomic handles make the Core SP easy to maneuver.

Features:

Nonferrous Core SP Cart
Polyethylene and ABS plastic construction
Economical
Bulk storage area
Built in handles
52 pounds

Clear PETG sliding door
Seamless one piece top
3 full extension drawers
15" W x 35" H x 19" D
