

Non-Magnetic MRI Lights

We're showing you a vast selection of Non-Magnetic MRI Lights. Lighting is a necessary part of your MRI Environment and we are showing all of your options.

Non-Magnetic MRI Lights

MRLequip has extensive experience dealing with MRI Lighting Products. They have many different selections to choose from including mobile lighting, ceiling lights, and more. They also supply replacement bulbs, transformers, and more. MRLequip has selected the top Non-Magnetic MRI Lights for you to choose from. Since they've been dealing with this equipment for a long time they know which manufacturers supply the most durable and longest lasting lighting.

Non-Magnetic MRI Ceiling Mount Lighting

These lighting products are thoroughly tested for MRI compatibility. Long extension arms and a high rotation radius allows for optimal lighting in many different areas of your MRI unit. They are ideal for surgical applications and specialty procedures where maneuverability and compact design are key requirements.

Non-Magnetic MRI Portable Lights

MRLequip's portable lighting is also a very effective means of lighting. Many doctors involved in MRI units highly recommend at least one portable MRI light in any unit. These lights are also excessively tested for MRI compatibility and have no limits to its reach, range of motion, and flexibility.

Non-Magnetic Lighting

There are many other products for your MRI lighting. If you want to view more options please look at [MRIequip's Non-Magnetic MRI Lighting Selection](#).
