Comfort Pillow Positioners

This innovative pillow was designed to gently elevate and support the head, thus relieving stress on the shoulders during diagnostic MRI and CT procedures where the patient's arms are held over head. Because it is constructed of high-density foam, the pillow provides excellent patient support. Two hand straps allow the patient to hold-on during the procedure, thus increasing their security. As a result of unique design, the patient's arms can be kept in a straight and more comfortable position for safe contrast injections.

Patient Comfort System General 12 Piece Positioner Kit

The Patient Comfort System was developed over a 2-year period in close cooperation with leading imaging centers to maximize patient comfort as well as conform to the specific requirements for compatibility and safety. This viscoelastic material used for medical imaging has been specifically formulated to maximize patient comfort and maintain a thin form factor while optimizing the available free space for the patient when inside the MRI bore. These mattresses and positioners are compatible with existing tables and are designed to simply replace the current pads. The basic system consists of four rectangular mattress pads covered with advanced breathable space-age waterproof material which resists staining and makes cleaning easier. A knee wedge and neck roll are also included to maximize patient comfort. To increase safety, all pads have an anti-slip undersurface to keep the pads in place while patients are getting on and off the table.

Pearltec Positioners

The innovative patented Pearltec technology uses a combination of soft movable polystyrene pearls and inflatable air chambers to provide optimum fixation of the patient during MRI and CT studies in order to reduce motion artifacts.

Benefits:

Fewer repeated exams.

The soft movable polystyrene pearls along with flexible air chambers let the Pearltec products adapt to the individual patient. This gives optimum fixation of the patient, minimizes motion artifacts, improves image quality and reduces the number of exam repetitions. This makes the workflow significantly more efficient.

Crania Positioner

The CRANIA and GeNUS products from Pearltec are available in both child and adult sizes and have been developed for head and knee examinations. The CRANIA was developed for head exams and functional MRI. The GeNUS was developed to aid in the orthopedic examinations of the knee.

Model	Description	Price
PO-4009	Adult Crania Positioner	\$2,250.00 ea.
PO-4010	Child Crania Positioner	\$2,250.00 ea.

This product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

Pearltec Multipad Positioners

The MULTIPAD range of products from Pearltec are positioning cushions that can be used anywhere because their size can be changed by simply increasing the volume of air with the hand pump. MULTIPADS are used to position the patient individually and comfortably during CT and MR examinations. This results in less patient movement thereby minimizing motion artifacts. The flexible MULTIPAD product family consisting of MULTIPAD Standard, MULTIPAD Plus and MULTIPAD Slim can be universally used, either alone or in combination during all examinations with head and extremity coils.

As a guideline, once the red indicator line appears on the Multipad, the customer needs to re-order positioners.
