

Now, at your fingertips, is a diverse line of Non-Ferrous and PVC products for your MRI environment. MRlequip.com was established to provide the highest quality MRI compatible equipment with price tags significantly lower than the current marketplace. In the past, it was a priority to clear the room of all ferrous materials that pose an immediate risk. Now, a majority of those items can be replaced, in extent saving time and creating a friendlier environment for both the patients and the providers. Beyond the standard items, such as wheelchairs, i.v. poles and stools, a whole new world of products has opened up. Ranging from sound systems to furniture, these products increase patient comfort while decreasing concerns for injury and liability.

At MRlequip.com, we are constantly researching new products and welcome any suggestions you might have. If you can't locate what you require, let us know. Our design teams are ready for their next challenge.

## Ferno MRI Gurney 400 lb Capacity

Model 30NM The "Standard" and the lightest lift-in cot in the industry. Ferno's Model 30 Multi-Level, Lift-in Cot served as the industry standard for many years and is still used by many ambulance companies and medical facilities. The Ferno Model 30 cot adjusts to six height levels, enabling patient transfer from most nursing home beds or hospital treatment tables. To operate the height adjustment mechanism, the EMTs must assume the patients weight prior to raising or lowering the cot-bed frame. Because the Model 30 must be lifted to be loaded into the vehicle, it can be used with ambulances that have various floor heights. The Model 30 cot will work well in station wagons, vans or modular ambulances. The telescoping head-end main frame section allows the Model 30 cot to be shortened for maneuverability around tight corners and spaces. The Model 30NM is the Non-Magnetic version for medical treatment areas where the cot must be non-magnetized.

## Ferno MRI Gurney 500 lb Capacity

Model 35ANM The lightest cot available with a 500 lb weight capacity. The Ferno Model 35ANM Mobile Transporter Multi-Level Roll-In Cot combines the benefits of a multi-level cot with the easy loading feature of a roll-in style cot. Designed for a variety of ambulance floor heights, the Mobile Transporter will work well with station wagons, vans or modular ambulances. EMTs no longer have to lift from the side to load the cot. One EMT is positioned at the foot of the cot, while the other EMT simply raises the undercarriage during loading. Eight height positions enable easy patient transfer from any couch, bed or treatment table. The Mobile Transporter should be rolled in a level position. The two inclined positions are designed as loading positions for either vans or modular ambulances. The Model 35ANM is the Non-Magnetic version for medical treatment areas where the cot must be non-magnetized.

## Friction Reducing Patient Transfer Sheet

Friction reducing patient transfer and re-positioning sheet designed to prevent disabling back injuries to healthcare workers.

### Features:

#### Accessibility

Individually wrapped Z-Sliders fit comfortably in scrub pockets, making it easily accessible when you need it and enhances team compliance by eliminating the need to locate a transfer device.

#### Compliance

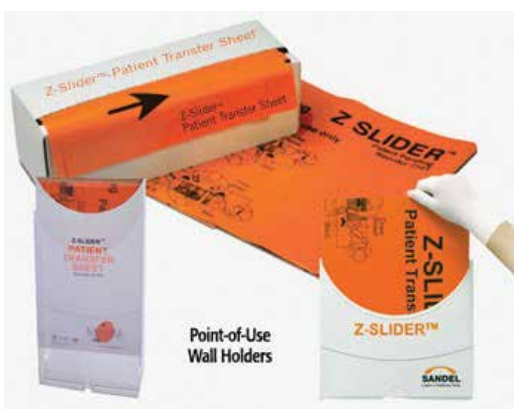

Z-Slider complies with OSHA recommendations and “No-Lift” state laws decreases physical strain to back, shoulders, neck and arms.

Single patient use reduces the potential for cross-contamination

Convenient point-of-use holders for patient rooms, common areas and or in the O.R.

#### Restrictions

This item **CANNOT** be left under patients during an MRI or for long periods of time as it can cause damage and tissue breakdown and possibly some artifacts in some imaging modalities.

## Load Grips, with Rubberized Pre-Molded Handle

Set of 4-2" poly strap with rubberized pre-molded handle for a no-slip grip, choose red or black below.

The Load Grips assist the user while lifting by extending the handle a flexible and adjustable 13 inches. Designed primarily with backboards in mind, Load Grips make it easier to lift with the proper technique, relieving lower back pain. They also prevent scraping of the knuckles on the ground and minimize contact with the patient while carrying the board – this is extremely helpful when the backboard handles are difficult to access due to the size of the patient. The flexible and adjustable nature of Load Grips ease transporting patients through stairways and awkward or confined spaces. Try Load Grips with other heavy gear, like fire hoses or to extend a handle.

### Features:

Use to lift backboards and other heavy and awkward gear.

Compatible with all backboards.

Quick and easy application.

Durable and long lasting with normal cleaning protocol.

2" poly strap with rubberized pre-molded handle for a no-slip grip.

## Ferromagnetic Detection System HALO II Plus MRI Entry System

FerrAlert™ HALO II - Ferromagnetic Detector complies with ACR and JCAHO standards to protect the magnet room against moderate to large size ferromagnetic projectiles. This product significantly helps to protect the investment in the magnet and to avoid a catastrophic accident. FerrAlert™ HALO II ENTRY has been certified by Siemens Medical Solutions for installation and use inside the magnet room for both 1.5T and 3.0T MRI magnets. **Plus System reduces alarm fatigue by sensing direction of personnel and accepts Ferromagnetic Incident Log Manager (F.I.L.M.)**

### OPERATION:

The Green LED HALO array illuminated around the MRI entrance indicates that the detector is scanning and there are no ferromagnetic threats detected.

A Yellow beacon light indicates that a threat is approaching the portal.

The Red LED HALO array flashes the entire portal, indicating a major threat such as a ventilator or oxygen cylinder has approached the portal.

The greater the threat, the further away the warning is activated.

Ferrous objects not approaching the entrance to Zone IV do not trigger an audible warning.

### SPECIFICATIONS:

Dimensions: Height 83" (211cm), Depth 2.25" (5.7cm)

Adjustable Width: 42" (107cm) to 52" (132cm) Inside; 47" (119cm) to 57" (145cm) Outside

Complies with ES60601-1-8 International Standards for Medical Device Alarms

Complies with IEC 60101-1:2005 Medical Device Specifications Requirements

Medical Power Supply: 100 to 240 VAC, 47 to 63 HZ, 42 Watts

Sensitivity: Adjustable

Audio Alarm: In Portal

Photoelectric Beam: Activates Alarm Function mode when moving object enters Portal

## Desktop/ Portable Pulse Oximeter

The Nonin 7500FO Pulse Oximeter incorporates a Fiber Optic sensor, meeting the unique needs of MRI users for patient safety and image quality.

Product highlights include:

**Safe-to-use** - Fiber optic sensors eliminate the possibility of RF burns in the MRI environment

**Convenient** - Non-magnetic pole mount system for easy access

**Economical** - Long-life internal rechargeable battery system and light-weight design

**Customizable** - pulse tone with variable pitch; audible and visual alarms for pulse rate & SpO2

**Expandable** - Optional 18 hour memory for software review of SpO2 & pulse rate

**Flexible** - Multiple interface & printing options

**Pole Mount** - Fits poles with 5/8" to 1 1/2" Diameter Poles sold separately below.

### Warranty:

2 Years on Pulse Oximeter

1 Year on Internal Battery

90 Days on Fiber Optic Cords & Other Components

## Comfort Pillow Positioners

This innovative pillow was designed to gently elevate and support the head, thus relieving stress on the shoulders during diagnostic MRI and CT procedures where the patient's arms are held over head. Because it is constructed of high-density foam, the pillow provides excellent patient support. Two hand straps allow the patient to hold-on during the procedure, thus increasing their security. As a result of unique design, the patient's arms can be kept in a straight and more comfortable position for safe contrast injections.

## Patient Comfort System General 12 Piece Positioner Kit

The Patient Comfort System was developed over a 2-year period in close cooperation with leading imaging centers to maximize patient comfort as well as conform to the specific requirements for compatibility and safety. This viscoelastic material used for medical imaging has been specifically formulated to maximize patient comfort and maintain a thin form factor while optimizing the available free space for the patient when inside the MRI bore. These mattresses and positioners are compatible with existing tables and are designed to simply replace the current pads. The basic system consists of four rectangular mattress pads covered with advanced breathable space-age waterproof material which resists staining and makes cleaning easier. A knee wedge and neck roll are also included to maximize patient comfort. To increase safety, all pads have an anti-slip undersurface to keep the pads in place while patients are getting on and off the table.

## Pearltec Positioners

The innovative patented Pearltec technology uses a combination of soft movable polystyrene pearls and inflatable air chambers to provide optimum fixation of the patient during MRI and CT studies in order to reduce motion artifacts.

### Benefits:

Fewer repeated exams.

The soft movable polystyrene pearls along with flexible air chambers let the Pearltec products adapt to the individual patient. This gives optimum fixation of the patient, minimizes motion artifacts, improves image quality and reduces the number of exam repetitions. This makes the workflow significantly more efficient.

## Crania Positioner

The CRANIA and GeNUS products from Pearltec are available in both child and adult sizes and have been developed for head and knee examinations. The CRANIA was developed for head exams and functional MRI. The GeNUS was developed to aid in the orthopedic examinations of the knee.

This product complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

Model	Description	Price
<b>PO-4009</b>	Adult Crania Positioner	\$2,362.50 ea.
<b>PO-4010</b>	Child Crania Positioner	\$2,362.50 ea.

## Pearltec Multipad Positioners

The MULTIPAD range of products from Pearltec are positioning cushions that can be used anywhere because their size can be changed by simply increasing the volume of air with the hand pump. MULTIPADS are used to position the patient individually and comfortably during CT and MR examinations. This results in less patient movement thereby minimizing motion artifacts.

**As a guideline, once the red indicator line appears on the Multipad, the customer needs to re-order positioners.**

## Artificial Sky Ceiling Tile Art and Decorative Wall Murals

How can you have a blue sky in a room with no windows? How can you make your ceilings and walls come to life? With Artificial Sky Ceiling Tile Art and Decorative Wall Murals  
The future of radiology departments is not only new imaging equipment, it is focused on becoming more patient-care oriented. A typical MRI or CT Scan can terrify the bravest souls and cause not only unnecessary stress, but delayed recovery times. A relaxed patient is more receptive, therefore they are more responsive to treatment.

Ceiling Art is scientifically proven to: Lower Blood Pressure, Reduce Stress/Anxiety, Decrease Muscle Tension, Reduce Pain, and Re-Direct Negative Thought.

## Are your current MRI supplies certified?

MRlequip.com proudly introduces the first of its kind non-ferromagnetic MRI certified biopsy tray to include both a scalpel and needle. The first biopsy tray significantly reduces your fine institution of liability, when used in the prescribed fashion. Please call for MRI certification for future purchases. Thanks to your radiology family, larger production runs have lowered the price to \$399.00 for a case of 10 trays. That's just **\$39.90** per tray.

## MRI Non-Ferromagnetic "Certified" Biopsy Tray

Featuring a Non-Ferromagnetic Scalpel and Non-Ferromagnetic Needle

**SAFETY:** MRlequip.com is committed to bring to you the only MRI Non-Ferromagnetic Certified Biopsy Tray. Designed and certified within the guidelines of the new ASTM standards in effect so your facility no longer has to assume the liability for any safety accidents due to items made with ferrous materials.

**USAGE FLEXIBILITY WITH LESS WASTE:** Based on customer feedback for increased ordering and procedure flexibility you'll note that we packaged the main biopsy components separately as well as in a MRI biopsy tray. Trays can also be used as a MRI localization tray.

**UNIQUE DESIGN:** MRlequip.com offers the only MRI Non-Ferromagnetic certified disposable scalpel and MRI Non-Ferromagnetic certified needle.

**COST EFFECTIVE:** This product is a first of its kind. Developed by technologists who perform the procedures. It is cost effective, practical and safe to use. The trays are completely sterile and disposable.

**MR Conditional to: 3-Tesla**

The trays have a 2 year expiration date.

### Accu-Draw IV Clamp

MRI ACCU-DRAW™ provides one-handed access to non-sterile vials while maintaining sterility. ACCU-DRAW keeps vial labels visible at all times, and angles vials so they can be completely emptied. Made of brass, plastic, and aluminum. How it Works: The durable plastic holder accommodates two single-dose and three multi-dose vials at a time. Clamps onto any table surface. Vials that run out can be replaced with fresh ones at any time during the procedure. You'll know vials are secure because they click and lock into place. Holds vials at the perfect angle, allowing complete emptying and reducing medication waste.

Model	Description	Price
FO-1117	Accu-Draw IV Clamp	\$360.23 ea.

### MRI Non-Ferromagnetic 3 Gal. Sharps Container

Has a dual-purpose lid, which allows the container to remain open for code situations or in a free-fall position for normal, one-handed operation. Lid features a needle key for safe removal of needles when necessary. Safely stands on table top or cart.

### MRI Non-Ferromagnetic 2 Gal. Sharps Container

Provides open access for disposal of a variety of shapes and sizes of sharps, (i.e. needles and syringes, vials, test tubes and glass slides). Lid features a needle key for safe removal of needles when necessary. Can be wall mounted or safely stands on table top or cart.

### MRI Non-Ferromagnetic 3 Qt. Sharps Container

The rotating cylinder top permits convenient, one-handed disposal of sharps. The rotating lid automatically drops needles and syringes in a horizontal position to maximize capacity. Lid remains closed when not in use. A built-in needle key permits the safe removal of needles when necessary. Units lock onto a wall bracket and are removed with a master bracket key.

## DuoFLEX®

Multipurpose and efficient. Work smarter.

### Administrators

#### INVEST IN YOUR BOTTOM LINE

Replace multiple costly coils with one DuoFLEX® Coil Suite. DuoFLEX® extends the life of your MRI equipment, increases productivity, and delivers a quantifiable ROI. You will measurably – and cost effectively – improve efficiency and the standard of care for your patients.

### Technologists

#### FREE YOUR IMAGINATION

Spend less time between scans replacing and preparing different surface coils and produce more high-quality, diagnostic images. The DuoFLEX® Coil Suite is flexible enough to scan any body part without causing patient discomfort. If you can imagine it, you can scan it.

### Radiologists

#### SEE THE DIFFERENCE

Deliver definitive diagnosis on sub-optimal anatomy and hard-to-scan patients. The DuoFLEX® Coil Suite acquires the quality images you need time after time, without compromise.

### 3 Mode Continuous Vacuum Suction Regulator

**It's Field Serviceable ...**The unique modular design makes repair a breeze for any biomed or central supply department. The unit is made up of six (6) easy-to-replace modular components.

**It's Compact ...**As a result of its modular design, the unit is 25-50% smaller than other suction regulators making it the product of choice for crowded wall and rail areas.

**It's Sturdy ...**The case is made of strong ABS plastic. It features a smooth surface with rounded corners making cleaning easy. The case also houses the gauge for extra protection.

**It's User-Friendly ...**The large control knob and easy-to-read settings make vacuum adjustments simple, even in emergency situations.

## MRI Non-Magnetic Emergency and Transport Ventilator

The emergency ventilator is designed for caregivers wherever breathing failure emergencies occur: in hospitals, industrial or commercial setting, transport situations, or remote locations. The unit's simplicity, portability, and safety make it the ideal choice for emergency ventilation. A single control for setting the frequency and tidal volume, including a click-stop setting at the recommended adult position, enables rapid set-up in demanding circumstances. Auto/manual controls, a patient demand system, MRI compatibility, and other features provide the means to manage respiratory emergencies.

### Technical Specifications:

#### Tidal Volume and Frequency:

150 ml/25 bpm  
300 ml/20 bpm  
450 ml/15 bpm  
600 ml/12 bpm (detent)  
750 ml/11 bpm  
900 ml/10 bpm  
1050 ml/10 bpm

#### Flow Range: 11-32 L/min

Air Mix: No

#### Pressure Relief with Pneumatic Alarm:

40 cm H<sub>2</sub>O standard  
60 cm H<sub>2</sub>O optional when purchased

#### Dimensions:

Length: 6.69 inches (170 mm)  
Width: 3.74 inches (95 mm)

## MRI Non-Magnetic BabyPac with Integrated Alarms

**1 Year Warranty**

BabyPac is specially designed to deliver ventilation to small, fragile lungs of patients ranging from neonates through pediatrics up to 20kg with precision and confidence. It has a sophisticated range of ventilation controls including CPAP, variable I:E ratio and variable oxygen concentration. The latter is particularly important in neonatal intensive care and transport since high oxygen concentrations over a prolonged period can be harmful. Baby Vent also incorporates a comprehensive range of alarms.

## Pre-Filled Fire Extinguisher

The Model FE-2000 fire extinguisher is designed to be the ideal fire extinguisher for hazard areas that require a reliable and safe non-magnetic fire extinguisher.

### Features

- Pre-Filled for A, B and C fires
- No Clean Up - No Residue
- Non-Magnetic (tested up to 3 Tesla)
- Safe for sensitive electronic equipment
- Safe for exposure to occupants
- Zero ozone depletion
- Six-year limited warranty from date of delivery to original end-user purchaser
- FAA approved
- Rechargeable
- UL/ULC Listed
- Meets or exceeds requirements of ANSI/UL 2129 and 711
- Temperature range is -40°F to 120°F (-40°C to 49°C)
- Mounting bracket included

## De-Ionized Water Fire Extinguisher

The ultimate extinguisher for class A fires, especially where a potential Class C (electrical) hazard exists. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent and reduces scattering of the burning materials. Unequivocally the best extinguisher for hospital environments, telecommunications facilities and "clean room" manufacturing facilities.

### User Friendly:

Wand provides greatest operator safety  
Maximum visibility during discharge  
No electrical conductivity back to the operator  
No thermal or static shock  
Minimal training - simplest to use, least expensive agent available

### Clean:

No toxicity  
No respiratory concerns  
De-ionized water extinguishing agent  
Exclusive crevice free, butt welded cylinder  
Antiseptic white paint finish (easy to clean interior & exterior)  
No powder residue

## MR Conditional At 7T Or Less

Products from MRlequip Determined to be MR Conditional at 7-T or Less

**NISSWA, MN, DECEMBER 21, 2017**

MRlequip, an industry leader in innovating non-metallic MR Safe and non-magnetic or weakly magnetic MR Conditional equipment, announces that many of its patient support products have been tested by Dr. Frank G. Shellock. Dr. Shellock is the President of Shellock R & D Services, Inc. and an established MRI safety expert. The results indicated that these products are MR Conditional at 7-T or less.

Using the first clinically approved 7-Tesla MR system (Terra, Siemens Medical Systems), Shellock R & D Services, Inc. examined the magnetic field interaction for each style and type of non-magnetic or weakly magnetic equipment in association with this very-high-field scanner. Dr. Shellock stated, "I am pleased to report that every one of the products that underwent testing, including the relatively larger items such as the stainless steel stretcher, wheelchair, and utility table, passed our test procedures and, thus, are deemed MR Conditional at 7-Tesla or less. Importantly, the items that we tested represent many of the important patient support products that are commonly used in the clinical MRI environment."

"As the first 7-Tesla MRI scanner approved by the Food and Drug Administration hit the market, MRI facilities need to be prepared with new equipment to permit proper patient care in this special setting." Says Erich Schulz, President and Chief Executive Officer of MRlequip. "Today it's necessary to take extra precautions because 7-Tesla MR systems pose more than twice the magnetic field-related issues than the 3-Tesla MR systems."

MRlequip's line of non-metallic, non-magnetic, and weakly magnetic equipment, currently used in MRI facilities around the world, allows for the safe transferring of patients as well as for their proper management within every clinically utilized, MRI suite and includes essential accessories such as oxygen tank holders, gurneys, and IV poles. Determining this equipment to be MR Conditional at 7-T or less allows for their use in the same room as all current FDA approved MRI scanners.

### ABOUT MRlequip

MRlequip has been an industry leader in providing non-magnetic MR Safe and MR Conditional equipment for more than 15 years. Working directly with MRI facilities to work on their specific issues, needs and requirements, MRlequip innovates products to work within every MRI setting.

### ABOUT SHELLOCK R & D SERVICES, INC.

Shellock R & D Services, Inc. ([www.magneticresonancesafetytesting.com](http://www.magneticresonancesafetytesting.com) and [www.mrisafety.com](http://www.mrisafety.com)) is the World's most experienced MRI testing company that conducts comprehensive evaluations of implants, devices, objects, and materials. Shellock R & D Services, Inc. has access to MR systems operating from 0.2-Tesla to 7.0-Tesla, including dedicated-extremity and interventional MR systems.

## SuperWand

The SuperWand's exclusive 360° detection field provides uniform sensitivity and tip pinpointing to detect weapons and other metal objects with extreme accuracy. From U.S. airports to sporting events, the SuperWand is the hand-held of choice for today's security screener. Accurate detection of all ferrous, non-ferrous and stainless steel and other metallic objects. Elongated profile offers 360° detection coverage plus tip pinpointing for easy scanning from head to foot. Easy and convenient to use with one-touch button and three-color LED lights. Clear audible or silent / vibrate LED alarm signal. Large 9.5" scan area allows thorough scanning with minimum passes. Ergonomically designed grip fits comfortably in virtually every hand. 9V battery incl.

## Screening Magnet

**Powerful Rare-Earth Handheld Magnet for Magnetic Resonance Screening/Sites:**

Magnetic Resonance (MR) professionals must be able to screen patients, devices, and implants for possible ferromagnetic properties prior to allowing them to enter clinical and research magnetic resonance imaging (MRI) environments and magnet rooms (so-called, "Zone III and IV" regions). It has also been proposed that all MR sites have ready access to powerful, more than 1,000 gauss hand held magnets that they can use for such testing purposes. This magnet has been specially designed by experienced clinical and research MR practitioners and leaders in the field of MR safety to meet the needs of busy MR sites. The more than 1,200 gauss magnetic field of the magnet exerts a sufficiently powerful magnetic field to sensitively test even weakly ferromagnetic objects. The magnet itself is also composed of a neodymium - a so-called rare earth magnet - that permits it to lose its strength extremely slowly, at a rate of a 1% loss every 100 years. The recessed magnet in a custom foam-fitted housing, the form fitted handle, and the surface ball bearing mounts allow for ready removal of the magnet - by anyone - should it become inadvertently attached to large ferromagnetic objects, such as oxygen tanks, wheelchairs, etc. The bright red anodized coloring of the magnet housing contrasts well with the silver labeling clearly stating that the magnet is not MR safe and should not be brought into the MR magnet room/Zone IV regions. This magnet was developed in part with the help of Dr. Emanuel Kanal, Department of Radiology, University of Pittsburgh Medical School, and is field tested to provide years of reliable MR safety and compatibility testing under typical clinical and research MRI settings. Also optionally available is a foam padded carrying and storage case to protect the magnet between uses.

## Ferromagnetic Detection System HALO II Plus MRI Entry System

FerrAlert™ HALO II - Ferromagnetic Detector complies with ACR and JCAHO standards to protect the magnet room against moderate to large size ferromagnetic projectiles. This product significantly helps to protect the investment in the magnet and to avoid a catastrophic accident. FerrAlert™ HALO II ENTRY has been certified by Siemens Medical Solutions for installation and use inside the magnet room for both 1.5T and 3.0T MRI magnets.

**Plus System reduces alarm fatigue by sensing direction of personnel and accepts Ferromagnetic Incident Log Manager (F.I.L.M.)**

### OPERATION:

The Green LED HALO array illuminated around the MRI entrance indicates that the detector is scanning and there are no ferromagnetic threats detected. A Yellow beacon light indicates that a threat is approaching the portal. The Red LED HALO array flashes the entire portal, indicating a major threat such as a ventilator or oxygen cylinder has approached the portal. The greater the threat, the further away the warning is activated.

## GaussAlert Magnetic Field Strength Alarm System

GaussAlert is designed to help keep MR Conditional equipment outside of the MRI exclusion zone. GaussAlert is programmed to alarm when the preset magnetic field strength is exceeded. It produces an attention-getting audio alarm when MR conditional equipment is too close to the MRI magnet. GaussAlert can also be useful as an alert for MR unsafe equipment, such as a crash cart or an emergency resuscitator, which can be kept near, but should not be taken into the MRI magnet room.

See web site for more information.

## MRI Hand Held Metal Detector

The PD240C is a Hand Held Metal Detector that combines high reliability and ergonomics with advanced detection and operator signaling features. Deep penetration for weapons and minimum metal targets, effective sensitivity to all alloys, exceeding the latest Security Standards and high immunity to external metal masses are among the main peculiarities of this new device.

### Features:

Programmable Sensitivity

Long Detection Range

Extended Continuous Operation Time

Automatic Low Power Mode during Screening Pauses

Embedded Long Life Rechargeable Batteries

Embedded Fast and Reliable Battery Charger: no need of batteries removal

Dedicated Holder acts as Minimum Space Table Stand

Operator Functions can be customized by the user through PC GUI and USB

## Aegys Techgate MRI Signage System

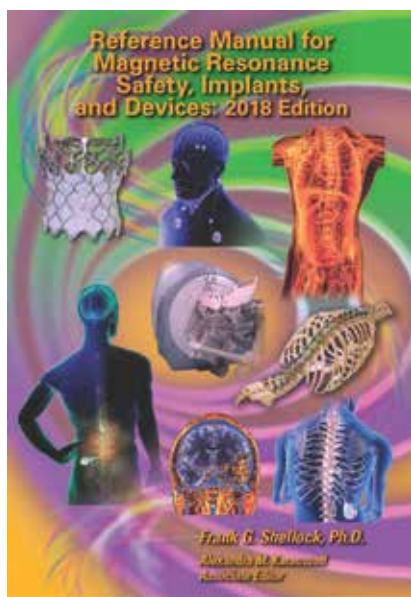

TechGate allows technologists to focus on the care of patients and efficient room turnaround rather than worrying about anyone entering the MRI room behind them. Easy to use and designed for the MRI environment, TechGate is deployed via push button remote control, providing an immediate physical restriction of access to all unauthorized individuals.

Every day at hospitals and health care facilities around the world, the safety of patients, technologists and medical personnel is put in danger when an MRI environment is accidentally violated by a seemingly innocent intrusion while a procedure is in progress. When MRI warning signs fail, patients and technologists risk physical harm, while priceless equipment is jeopardized for damage or destruction by someone who unknowingly enters an unsecured or open MRI door. There is now a simple and effective way to diminish that risk: TechGate.

## 2018 Reference Manual for Magnetic Resonance Safety, Implants, and Devices

The Reference Manual for Magnetic Resonance Safety, Implants, and Devices: 2018 Edition is an indispensable textbook for radiologists, MRI technologists, facility managers, and other healthcare professionals. This internationally acclaimed, annually revised, and fully updated textbook series is a comprehensive information resource that includes guidelines and recommendations for MRI safety and patient management. The content is based on the latest peer-reviewed publications, labeling information from medical device companies, findings from scientific investigations, as well as documents developed by professional and governmental organizations.

Importantly, this textbook is a vital source of information for implants and devices evaluated for MRI-related issues. "The List" contains tabulated data for thousands of objects, including products tested at 3-Tesla. The scope of the content covers the full range of implants and devices encountered in patients referred for MRI procedures.

Non Magnetic Non Sparking Toolkits

Our Non-Magnetic MRI toolkits are tested and meet the requirements by the US government for Non-Magnetic Hand tools. The MRI toolkits are for use in 3T magnets and below, so they are deemed MR Conditional. This enables the non-magnetic tools to be used near sensitive equipment. Waterproof Case 5" Deep is injection molded and utilizes ultra high-strength polypropylene copolymer resin. Features a gasketed, water-tight and dust-tight, submersible design that is resistant to UV, solvents, corrosion, fungus and impact damage. It also features a molded-in hinge, patent pending trigger release latch system, a comfortable snap-down rubber over-molded cushion grip handle, and an automatic ambient pressure equalization valve.

## Breast Shield

Today, CT Scans play a critical role in the diagnosis and management of most patients with complex thoracic and cardiopulmonary diseases. As the use of CT imaging increases, however, so does the risk for latent carcinogenic effects of ionizing radiation on radiosensitive tissue including the female breast. The recently redesigned AttenuRad Breast Shield System consists of a thin (1 mm) piece of bismuth impregnated synthetic rubber covering that mounts firmly on an offset quarter inch foam base. The breast shield system offers up to a 57% reduction of radiation exposure during a CT scan without significant changes in image quality, including artifacts and beam hardening effects. The single-piece AttenuRad CT Breast Shield is designed for multiple uses.

## CT Breast Shield System

Studies have indicated that infants and children are as much as 10 times more susceptible to carcinogenesis from radiation than adults. Breast tissue exposed to radiation from CT procedures involving the chest or abdomen is an area of particular concern for young females. The CT Breast Shield System provides significant in-plane breast shielding (57%) for pediatric MDCT, without qualitative or quantitative changes in the CT image. The use of the system's offset foam base gives the shields additional substance and durability, making them easy to use. The use of the elevating foam also decreases the patient's exposure to scattered radiation.

## Thyroid Shields - Case of 10

Positioned over the Adam's Apple, the AttenuRad CT Thyroid shield is designed to provide maximum protection to the radio sensitive thyroid gland. To ensure tight positioning, a curved notch in the center of the shield is placed around the Adam's Apple and an adhesive backing holds the shield firm as the patient breathes and swallows. The AttenuRad CT Thyroid shield, when used for the soft tissues of the neck, is cut to a thickness of 1 mm allowing for a 60% dose savings to the Thyroid.

## Eye Shields - Case of 20

The lens of the eye is sensitive to radiation during routine Cranial CT. Patient undergoing routine CT scans of the head are especially vulnerable to complications. The AttenuRad CT Eye Shield is a single-piece bismuth impregnated synthetic rubber covering designed to provide significant protection. The shield molds over the patients nasal bridge with the shielding portions laying flat over the patients closed eyes. Adhesive material ensures a tight seal with minimal air gaps. This shield is cut to a thickness of 1 mm, allowing for 50% dose savings to the eye lens. The AttenuRad CT eye shield, which can be used both for adults and pediatrics, is intended to be a single use product because of potential biological contamination.
