

P

All the MRI Safe Replacement Parts AND
the Tools you need to install them

Parts &
Accessories for:

MRI Wheelchairs

MRI Stretchers

MRI Step Stools

MRI Doctor Stools

MRI Mayo Stands

MRI Hampers

MRI Double Step Stools

MRI Injection Stands

MRI Oxygen Carts

MRI Maintenance - Tools

What can we do for you?

Upon initial contact we will customize a package based upon the procedures performed as well as the strength, weight capacity and brand of MR system(s) used. We will take into account specific product requests and determine the most cost effective solution to our customers needs. We present a quotation on a full custom package including freight, rather than a pre-packaged kit that is incomplete and contains items that may go unused. We specialize in custom non-ferrous products that may require additional time for production. We will provide the necessary lead time and discuss a final purchase order date that will allow for delivery before a grand opening or re-opening. Once a purchase order has been received, upon the customers request; we may hold all products to be delivered at one time or have it delivered as available. Products in stock at the time of order will be immediately tagged for that order and held until the release date. This eliminates the possibility of a stock item at order date becoming out of stock on the release date. We supply MSDS sheets on pertinent products for our customer's records. Two days before release date, we will contact our customer to verify they're ready for the delivery. If there is a delay in the facilities opening, we will hold the product until needed at no additional charge.

Above all else, we will take that extra step in providing our customers with knowledgeable advice, low prices, on-time delivery and excellent customer service. We recognize that each of these attributes are vital to a smooth transaction and a satisfied customer.

Before ordering, please read our company terms and policies on inside back cover.

Safety is our Business!

Our dedication to safety begins at 7:00 AM every day of the work week - it is our livelihood. All products in our warehouse are checked on entry and then re-checked on exit. Products drop shipped from our manufacturers directly to your door are brought in randomly and re-tested for safety verification. We continually work with all manufacturers to ensure safety and proper designation.

For more information on the ASTM Standard, visit www.ASTM.org and search for **2503-13**.

The highly anticipated Standard Practice for Marking Medical Devices for Safety in the Magnetic Resonance Environment by American Society for Testing and Materials (ASTM) has arrived.

As recommended by ASTM Intl; the intent of this practice is to provide needed information about the safety of items in and near MR scanners using a compact and easily recognized set of symbols and terms. The terms MR safe and MR compatible as first defined in 1997 in the FDA draft guidance document, "A Primer on Medical Device Interactions with Magnetic Resonance Imaging Systems," have been used to describe the safety of devices in and near MR systems. However, there has been a great deal of confusion surrounding this terminology. An incorrect assumption is often made, and users often incorrectly assume that items labeled MR safe or MR compatible are safe or compatible for any MR environment. MR environments vary in terms of magnetic field strength and RF conditions. This new system eliminates much of that confusion.

Icon Designation

MR Safe

Any item that poses no known hazards in all MR environments.

MR Conditional

Any item that has been demonstrated to pose no known hazards in a specified MR environment with specified conditions of use. Field conditions that define the specified MR environment include field strength, spatial gradient, dB/dt (time rate of change of the magnetic field), radio frequency (RF) fields, and specific absorption rate (SAR). Additional conditions, including specific configurations of the item, may be required.

MR Unsafe

Any item that is known to pose hazards in all MR environments.

Products **NOT** marked with a designation have been tested under the past methods and are currently being re-evaluated under the new ASTM Standards. Products will be updated continually.

Now, at your fingertips, is a diverse line of Non-Ferrous Parts and Accessories for your MRI environment. MRlequip.com was established to provide the highest quality MRI compatible parts with price tags significantly lower than the current marketplace. In the past, it was a priority to clear the room of all ferrous materials that pose an immediate risk. Now, a majority of those items can be replaced, in extent saving time and creating a friendlier environment for both the patients and the providers. Beyond the standard items, such as wheelchairs, i.v. poles and stools, a whole new world of products has opened up. Ranging from sound systems to furniture, these products increase patient comfort while decreasing concerns for injury and liability.

At MRlequip.com, we are constantly researching new products and welcome any suggestions you might have. If you can't locate what you require, let us know. Our design teams are ready for their next challenge.

Helpful Tips:

Determine Your Wheelchair Type:

Types: **Stainless Steel** or **Aluminum**

We have color coded and labeled each part. Determine what type you have, see pictures for reference.

Frame Made with **Stainless Steel** or

Frame Made with **Aluminum**

Note: Aluminum Wheelchairs and Stretchers are designed and made with materials to pass Non-Ferromagnetic entry systems. Please note that many stainless steel parts will fit on the aluminum chair and stretcher, but doing this will make the chair or stretcher no longer compatible with your entry system and will give false alarms. All parts are non-magnetic, but not all parts will pass entry system, so if you have an aluminum chair or stretcher, use the proper parts to keep your chair or stretcher compatible with the entry system.

Determine Your Wheelchair Size:

Determine your wheelchair size by measuring the width of your seat upholstery. If the width of your upholstery is 18", then you have an 18" Wide Wheelchair.

Exception: Chairs with Solid Seats, you must add 2" to the width of the solid seat upholstery to determine your chair size.

Example: If the width of your solid seat upholstery is 24", you will add 2" for a 26" Wide Wheelchair.

Determine Left or Right:

Determine Left or Right when sitting in chair or laying on stretcher.

Non Magnetic Non Sparking Toolkits

Our Non-Magnetic MRI toolkits are tested and meet the requirements by the US government for Non-Magnetic Hand tools. The MRI toolkits are for use in 3T magnets and below, so they are deemed MR Conditional. This enables the non-magnetic tools to be used near sensitive equipment. Waterproof Case 5" Deep is injection molded and utilizes ultra high-strength polypropylene copolymer resin. Features a gasketed, water-tight and dust-tight, submersible design that is resistant to UV, solvents, corrosion, fungus and impact damage. It also features a molded-in hinge, patent pending trigger release latch system, a comfortable snap-down rubber over-molded cushion grip handle, and an automatic ambient pressure equalization valve.

Model	Des.	Description	Price
TL-1980		23 Piece, Non Magnetic Non Sparking Corrosion Resistant Toolkit - SAE / Metric	\$2,570.00 kit
TL-1981		28 Piece, Non Magnetic Non Sparking Corrosion Resistant Toolkit - Metric	\$3,134.00 kit

Office Hours:

Monday thru Friday 7:00 am to 4:30 pm (CST)

Terms:

Our terms are NET 45 DAYS on all new and current accounts. C.O.D. if not current. Payments become due 45 days after the invoice date, if the order is complete or not. Shipments will be held if an account contains invoices over 45 days past due. The account will go on permanent C.O.D. when there is a history of past dues. Third party collection fees and legal fees must be paid in full before an account can be reopened.

Freight:

Freight will be prepaid and added to your invoice. Freight charges are part of your invoice and are due accordingly. Freight charges are not discountable.

Proof Of Delivery:

We will provide proof of delivery within 30 days of shipment upon request.

Claims For Damage Or Shortage:

Must be made within 48 hours of receiving. Shipping containers must be kept if shipment is damaged or short.

Shipments Arriving Via LTL Truck (Not UPS Or Fedex Ground):

The packages must be opened and inspected at time of delivery for any concealed damage.

Prices:

All prices are subject to change without notice. Prices reflect single unit cost, except where noted.

Returns:

No item will be accepted for return after 30 days from date of purchase. All returns must be labeled with a return authorization number which can be obtained from our customer service department. Claims for shortage, breakage or any other reason must be made within 48 hours of receipt. Shipping containers must be kept if shipment is damaged or short. All returns are subject to a minimum 15% up to a 35% restocking fee. The customer is responsible for all freight charges incurred.

Custom Products are NOT Returnable.

Cancellation Charges:

Orders may be canceled without charge providing your request is received prior to shipment except custom orders. If the merchandise has been shipped there will be up to a 35% restocking fee, plus all freight charges incurred. Please get cancellation confirmation to avoid these charges.

Other Order Information:

We reserve the right to split shipments. We sell on first come first serve basis. Where available, substitutions will be shipped if the product ordered is not available or discontinued.
