

GET THE MOST FROM MRI

With rising patient numbers, reduced staff resources and reduced reimbursements, optimizing MRI efficiency has become increasingly important.

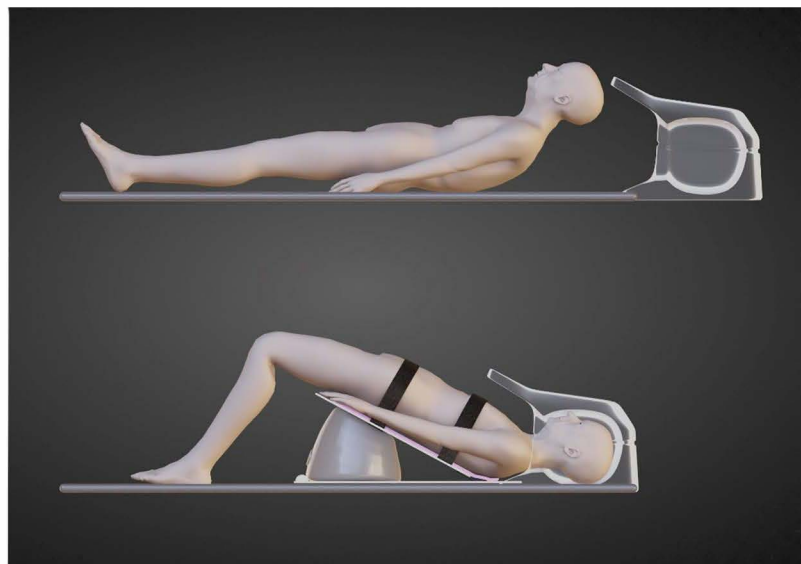

Patient conditions such as kyphosis, obesity, spinal fusions, and degenerative disk disease frequently require more time than allotted or reimbursed for.

Standardizing patient positioning using KyphoLift enhances efficiency throughout the entire patient workflow - from preparation to image acquisition, reducing labor and turn around times.

Outpatient Clinic Scan Time Comparison

Projected Revenue Gain in First Year of Use

KyphoLift offers the safe method for “no lift” care; -Benefiting staff and patients who have physical limitations or disabilities.

ELEVATING PATIENTS, ELEVATING CARE
